

Charcoal Grill Guidelines

1. Line the bottom of the grill with aluminum foil. (There are some large rolls in the clubhouse.)
2. After you are done using the grill, please clean the grill surfaces while they are still hot. (There should be some wire brushes for this purpose with the grills.)
3. Douse the coals with water either after use or the next day to insure that there are no live coals hidden in the ash.
4. Roll up the aluminum foil and ashes and dispose of them in the special metal container for that purpose (The marina will be supplying us the containers to use.)
5. Disassemble the grills and put them away in the gashouse.
